Re: *Baby Doe et al. v. Joshua Mast et al., Case No. 3:22-cv-49-NKM*

Ms. Wyer:

Today you will receive a link to Joshua Mast's set of specific documents he has identified as potentially requiring *Touhy* approval, consistent with the United States' application of *Touhy* in this and related proceedings, prior to being produced in response to the Plaintiffs' Requests for Production. As you previously requested, we have identified, to the best extent possible given our knowledge, which agencies whose approval appear needed for each document. Do hesitate for each out if you have any challenges receiving the documents or any other technical difficulties with the transfer.

Please note that by seeking approval of these documents for release, we do not waive any of the Masts' objections and concerns with how *Touhy* has been applied in this and related cases, including to these documents in question. We look forward to receiving a determination of the *Touhy* status of these documents.

Cordially,

A handwritten signature in black ink, appearing to read "Michael Francisco", written over a horizontal line.

Michael Francisco
